# ALMECO LOCKET

ENHANCE THE **ALMECOLOCKET** WITH SMART

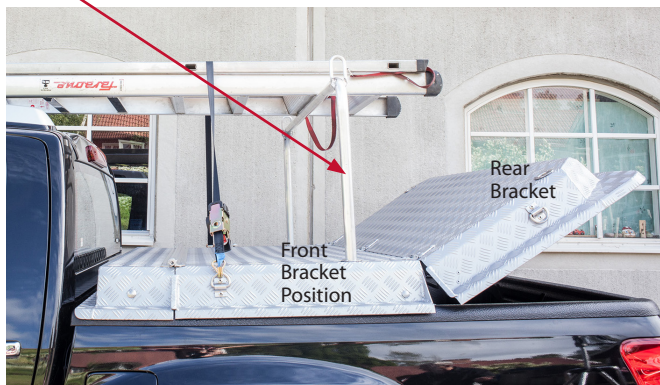

## ACCESSORIES

**Central lock ready** is a unique feature on the pickup cover market!

The Almecolocket central locking connects to the C-locking system on most pickup models and significantly increases the safety and theft protection of your pickup. You can store tools and cargo on the bed and feel quite safe when leaving your vehicle.

🔧 **Cargo rack.** Almecolocket can be fitted with stainless steel rack brackets on both the front and rear of cover. The rack is easily moved. The Almecolocket can be opened when the rack is in the front position. 100% aluminum. Stored in a holder under the lid.

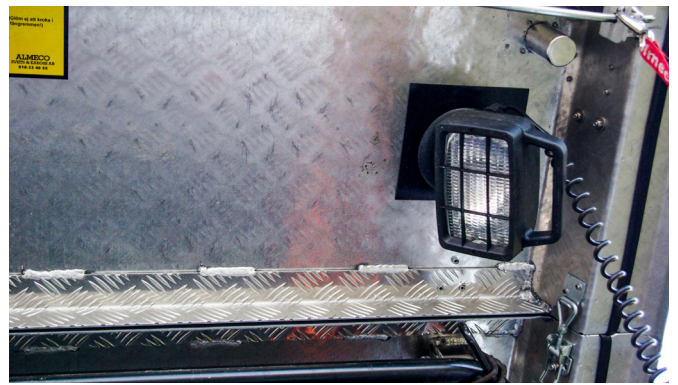

Rack in front position. Medium top load length. The cover can be opened and bed reached.

Rack in rear position. Max top load length. The cover can not be opened.

**Stainless Steel Bed Rail Caps** protects the car body and paint from wear when loading from the side or rear. High quality, model fitting and luster. Handmade by Almeo from bright annealed stainless steel sheet metal. The Bed Rail Caps is a long term investment increasing the car's resale value.

**Magnetic foot spotlight** with coiled cable. Strong spotlight with protective grille. Excellent for dark environments or night work. Electric wiring is extra if a 12 V socket isn't standard on the pickup.
